Auckland Uniservices	Page & Macrae
Beca	Parsons Brinckerhoff
Cheal	Plant & Platform
Eastland	Progen
Fitzroy Engineering Group	ReEx Capital
Geothermal Consultants NZ	SKM
Geothermal Energy Solutions	Wintec
GNS Science	

Activities (1)

- NZTE Support – strong support given until mid 2013 – future less clear
- Ulubelu Binary – opportunity to develop 30MW binary plant on waste steam from Ulubelu – under MOU with PGE; prefeasibility complete and next stage being resolved with PGE – some concern on well interference
- Pipeline Reporting – updated market information completed for Indonesia, Chile and increasing focus on Kenya

Activities (2)

- Commercial opportunities – being led by Hawkins with offers submitted with international partners in Indonesia, Kenya and recently Philippines – subcontractors to EPC providers
- Inward visit from Japan – 3rd country opportunities
- Other areas being investigated with MFAT support in Caribbean, Comoros, East Africa
- Aim to identify and bring forward projects where we have some control on rate of progress

Activities (3)

- Exploratory market visits made into Jordan, Saudi planned in December
- One year on a lot has been achieved
- Need continued and expanded support of industry – individual companies have to be able to take up opportunities – GEONZ provides market info and potential entrees only.
- Information dissemination and communication needs to be enhanced

Thank you
