

GEOTHERMAL HEAT PUMP ASSOCIATION OF NEW ZEALAND

The Geothermal Heat Pump Association of New Zealand (**GHANZ**) is an industry group working collaboratively across the geothermal heat pump industry in New Zealand.

Geothermal heat pumps are also known in some parts of the world as ground source heat pumps, or geo-exchange heating and cooling.

GHANZ are actively seeking new members to help develop this sector as a quality, renewable energy source for New Zealand homes, businesses and institutions.

GHANZ goals:

- to promote geothermal heat pump technology
- encourage quality
- expand the New Zealand geothermal heat pump market
- provide a forum for members to communicate and collaborate

Our members include geothermal heat pump suppliers, installers and designers, government agencies and other private organisations.

GHANZ was established under the New Zealand Geothermal Association (NZGA) in 2012.

To join **GHANZ**:

Complete the NZGA membership form and indicate in your communication that you wish to join **GHANZ**.

If you are already a member of the NZGA, simply email info@ghanz.org.nz and ask to be put on the **GHANZ** membership and email list.
